

# EVERY TIME YOU SLEEP WITH SOMEONE YOU SLEEP WITH THEIR PAST.

## Use Condom Sense. (After all what's a little latex between friends?)

These days you can't be too careful. You see sexually transmitted and blood borne infections aren't that fussy. They don't care if you are male or female, straight or gay, promiscuous or choosy.

The average person has 6 sexual relationships in their lifetime. So if you sleep with 6 other average people you are actually a part of a chain that totals a staggering **46,656** people.

## No wonder infections are spreading!

For more information about sexual health or to find out about our sexual health clinics visit:
